

Audit Services for Manufacturing Best Practices

UL's audit services mitigate supply chain risk and help protect brand reputation through verifying product quality, safety, and compliance programs at the factory level.

UL's Supply Chain Audits provide essential information that enables Brand Managers, Compliance Officers, and Quality Assurance Specialists to make informed decisions directly impacting brand credibility and product marketability.

Current Good Manufacturing Practices Assessments: Using UL's unique Six System Approach to Quality Management, this assessment helps evaluate if an FDA registered factory's quality system and operation meets or exceeds defined cGMP requirement.

Retail Certification Program (RCP): UL's annual cGMP assessment program offers a Certificate of Conformance upon successful completion of audit and corrective action activities. The Certificate gives the retailer a greater level of confidence in the product and gives the vendor credibility in selling their product to a retailer.

The National Brand Certification Program (NBCP) is a certificated, annual Good Manufacturing Practices (GMP) assessment intended to evaluate a facility used in your supply chain against current GMPs, as defined by the FDA's Code of Federal Regulations and current industry standard for the type of product you produce, purchase, or introduce into the National Brand Market.

British Retail Consortium Assessment (BRC): UL certifies a factory's system to the BRC/RILA Global Standard for Consumer Products for the design, production, packaging, and storage of consumer products ranging from general merchandise to health and beauty aids.

UL's auditor expertise is unparalleled in the following technical scopes:

- Over-The-Counter Drugs (OTC)
- Dietary Supplements
- Active Pharmaceutical Ingredients (API)/Excipients
- Dietary Ingredients
- Medical Devices
- Cosmetic/Personal Care Products
- Food
- Infant Formula
- General Consumer Products

UL also offers various training relating to Internal Auditors, Third Party Auditors, Risk Assessment, Quality System, cGMP, and Validation.

UL is a premier global independent safety science company that has championed progress for 120 years. Its more than 10,000 professionals are guided by the UL mission to promote safe working and living environments for all people. UL uses research and standards to continually advance and meet ever-evolving safety needs. We partner with businesses, manufacturers, trade associations and international regulatory authorities to bring solutions to a more complex global supply chain.
