

UL's National Brand Certification Program (NBCP)

UL's accredited supply chain certification service helps businesses mitigate risk and helps protect brand reputation, while providing confidence to consumers.

UL's Supply Chain Audits provide essential information that enables Brand Managers, Compliance Officers, and Quality Assurance Specialists to make informed decisions directly impacting brand credibility and product marketability.

The National Brand Certification Program (NBCP) is an annual Good Manufacturing Practices (GMP) assessment intended to evaluate a facility used in your supply chain against current GMPs, as defined by the FDA's Code of Federal Regulations and current industry standard for the type of product you produce, purchase, or introduce into the National Brand Market.

National Brand Owners and Vendors rely on UL's NBCP audit reports and Certificate of Conformance. Achieving Certification and a final report from UL's ACLASS accredited GMP program gives the National Brand Owner a greater level of confidence in the product and gives the vendor more credibility in selling product to a National Brand.

UL's auditor expertise is unparalleled, which is why multiple Brand Owners rely on UL to conduct their Supply Chain's third party audits and to follow up on corrective action resolution within their supply chain.

Globally, UL is ACLASS Accredited by the ANSI-ASQ National Accreditation Board to provide Certification Marks in the following technical scopes:

- Over-The-Counter Drugs (OTC)
- Dietary Supplements
- Active Pharmaceutical Ingredients (API)/Excipients
- Dietary Ingredients
- Medical Devices
- Cosmetic/Personal Care Products
- Cosmetics ISO 22716
- Food
- Infant Formula
- General Consumer Products

Since 1894, UL has been a respected leader in safety science. Today, UL is advancing its commitment to protecting people, products and places through expert advisory and independent quality assurance testing, inspections, and assessments for a wide range of consumer products. Our network of more than 152 laboratory testing and certification facilities in 40 countries helps drive the integrity of global supply chains, optimize product performance and protect brands. For more information about our certification, testing, inspection, advisory and education services, visit UL.com.
