

The British Retail Consortium/RILA Global Standard for Consumer Products

Objective British Retail Consortium assessments help an organization consistently produce safer, market-approved consumer products to the quality required by its customers or demanded by consumers.

UL is licensed by The British Retail Consortium (BRC) to conduct third-party audits, which certify an organization's management system for the design, production, packaging and storage of consumer products ranging from general merchandise to health and beauty aids.

UL and The British Retail Consortium share similar core values, which are to assist organizations to consistently produce safer, market-approved consumer products to the quality required by its customers or demanded by consumers. UL's BRC audits also help mitigate supply chain risk, promote product and consumer safety, and help protect brand reputation.

British Retail Consortium audits provide essential information that enables Brand Managers, Compliance Officers, and Quality Assurance Specialists to make informed decisions, directly impacting brand credibility and product marketability.

UL offers BRC audits across multiple scopes and categories including, but not limited to Textile Products, Wooden Products, Chemical Products, Rubber and Plastic Products, Metal Products, and Electrical Products.

Successful completion of UL's BRC Audit rewards an organization with numerous valuable deliverables such as a Certificate of Conformity bearing the UL Enhanced Mark, Use of the UL Certification Badge, access to The BRC Global Standards Directory, Corrective Action Tracking, a final report, and a BRC Grade.

Since BRC Global Standard conformance is now a requirement for various market leaders, rely on UL to assess your organization's management system in order to meet or exceed the expectations of your customers.

If conformance to The BRC Standard is not yet achievable, UL's Bridge the Gap Program provides an organization a tiered approach towards compliance with the BRC/RILA Global Standard for Consumer Products.

Since 1894, UL has been a respected leader in safety science. Today, UL is advancing its commitment to protecting people, products and places through expert advisory and independent quality assurance testing, inspections, and assessments for a wide range of consumer products. Our network of more than 152 laboratory testing and certification facilities in 40 countries helps drive the integrity of global supply chains, optimize product performance and protect brands.
